Hickey Fix

Introducing

Hickey Fix

“Heal your hickey with Hickey Fix and start winning your day.”

TARGET MARKET:

- Young adults and teenagers
- Conservative individuals

FEATURES:

- Metallic cooling and warming bulb.
- Mini coil heater and Micro cooler pads.
- Anti-inflammatory lotion.
- Wax rotator.
- LCD Temperature gauge.

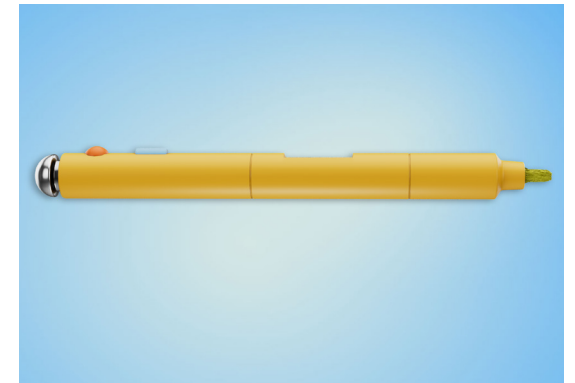

PATENT INFORMATION:

Patent pending.

SUMMARY:

Introducing the Hickey Fix, an ingenious invention designed to effectively and discreetly treat hickeys, also known as love bites or kiss marks. This revolutionary device harnesses advanced technology to provide a quick and efficient solution for those seeking to minimize the appearance and expedite the healing of hickeys.

The Hickey Fix features a unique heat-resistant plastic pen-like cooling tool that, when applied at the earliest stage of a hickey, serves to cool the inflamed area, neutralize skin bruising and dam-

age, and aid in the expedited healing process.

The Hickey Fix combines the benefits of a metallic warming and a cooling mechanism to provide targeted relief for the affected area. The device dispenses a proprietary blend of anti-inflammatory specialized healing agents and natural ingredients carefully formulated to reduce redness and swelling and promote the healing process. These ingredients work synergistically to soothe the skin, accelerate blood circulation, and encourage the regeneration of damaged tissues.

The sister tool to the Hickey Fix is the Hickey Fix 2. You will find that when used as a complete system or in conjunction with the Hickey Fix, the function of the Hickey Fix 2 as a concealer will further expedite the visibility of the hickey and help maintain your discretion as it heals.

About the Developer

Kimberly Hill from West Kingston, RI, was working with a grocery deliver service when a college girl placed an order for a variety of items she later learned were to cover up several hickies for a special event she planned to attend. She assisted her in obtaining these items by shopping at two different stores. The difficulty of putting together all the items helped her develop her invention. Kimberly contacted the Mars Rising Network and had a provisional and design patent application filed and had the invention designed properly so that she may see success with this great idea and turn it into a real product. She is actively seeking a company that would have an interest in licensing the product for royalty. Working with Mars Rising Network, this essential new design concept was refined and prepared to be presented as a commercial product.
